

## Description of the problem and a discussion of the background.

### Introduction/Business Problem

The company I am working for is looking to open a restaurant in the city of Toronto. So im going to leverage the foursquare data for Toronto city and find a area where there is a large community of residents, easy access to transportation and less competitors

### Target an audience

For any company (Small business or large franchises) looking to open a restaurant or cafe in Toronto city.

### Description of the data

1. Boroughs, Postal code, neighborhoods of Toronto
2. Geo locations for each postal code
3. Subway metro stations and their geolocation
4. Apartments/houses in each neighborhood with their details and geolocation
5. venues for each neighborhood and subway metro stations

### How the data will be used to solve the problem

1. Use geopy and Foursquare for venue and geolocation data to map/cluster all the top 10 venues, subway metro stations for Toronto downtown to get a better understanding of all the venues/amenities near each subway station for analysing accesibility
2. Map/cluster the rental apartments for Toronto downtown to view the average number of apartments in a set radius around each subway station

Potential questions to analysis:

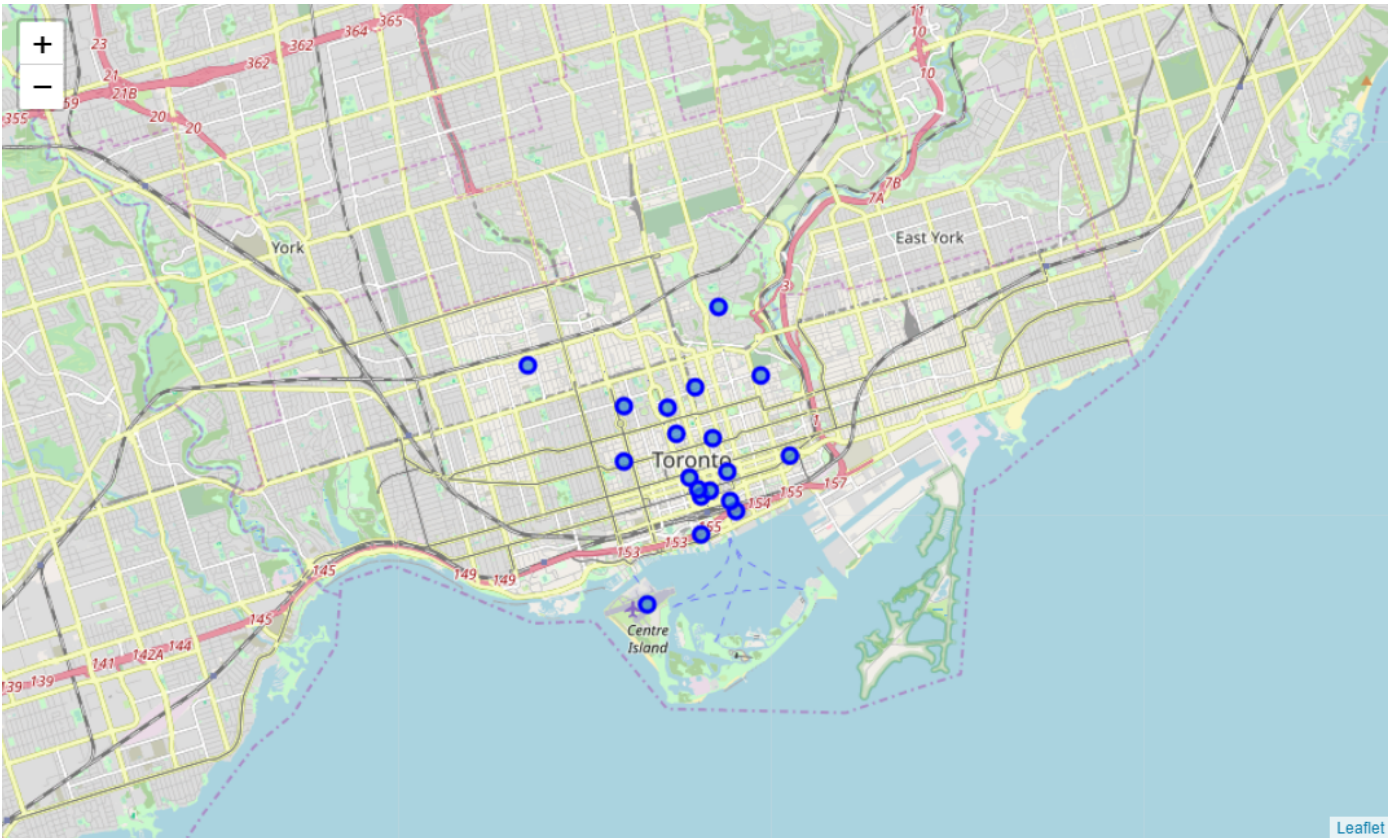

1. what is the number of apartments near each subway metro station in Toronto downtown?
2. What are the venues of the two best places cross to metro station with apartments?
3. How venues distributed in Toronto downtown around metro stations?

**Methodology section which represents the main component of the report where you discuss and describe any exploratory data analysis that you did, any inferential statistical testing that you performed, if any, and what machine learnings were used and why.**

Using geopy and Foursquare obtained the geolocation data for Toronto downtown

	Postal code	Borough	Neighborhood	Latitude	Longitude
0	M4W	Downtown Toronto	Rosedale	43.679563	-79.377529
1	M4X	Downtown Toronto	St. James Town / Cabbagetown	43.667967	-79.367675
2	M4Y	Downtown Toronto	Church and Wellesley	43.665860	-79.383160
3	M5A	Downtown Toronto	Regent Park / Harbourfront	43.654260	-79.360636
4	M5B	Downtown Toronto	Garden District, Ryerson	43.657162	-79.378937

Visualized all the different neighborhoods in downtown Toronto

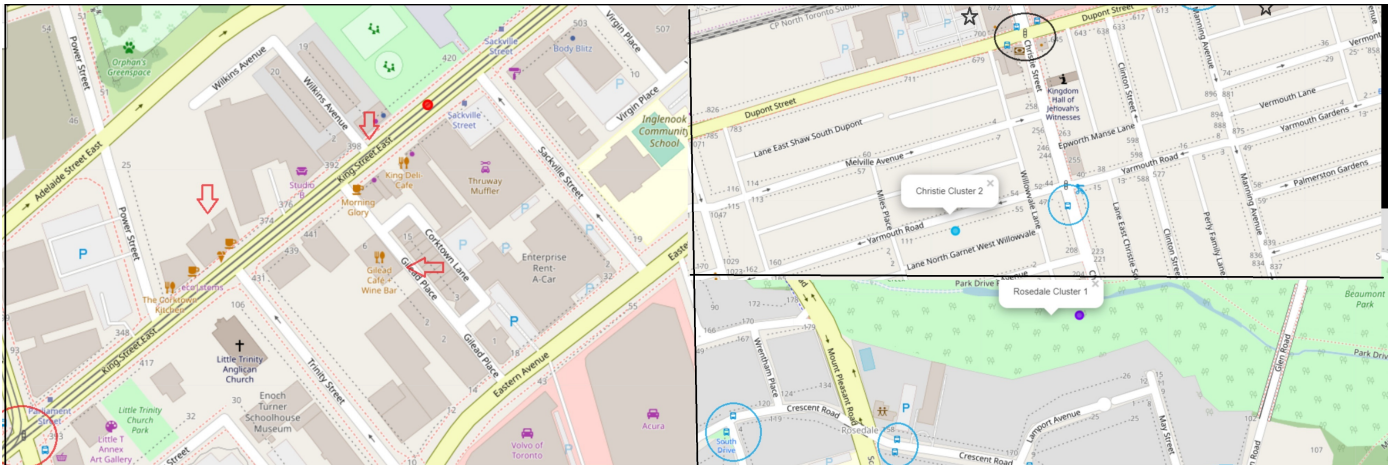

Analysing the top 9 venues in each of the neighborhoods for downtown Toronto to understand which neighborhoods have lesser restaurants and have parks

Neighborhood	Latitude	Longitude	Cluster Labels	1st Most Common Venue	2nd Most Common Venue	3rd Most Common Venue	4th Most Common Venue	5th Most Common Venue	6th Most Common Venue	7th Most Common Venue	8th Most Common Venue	9th Most Common Venue
Rosedale	43.679563	-79.377529	1	Park	Trail	Playground	Yoga Studio	Dance Studio	Dumpling Restaurant	Donut Shop	Doner Restaurant	Dog Run

Stn A PO Boxes	43.646435	-79.374846	0	Coffee Shop	Seafood Restaurant	Restaurant	Café	Hotel	Beer Bar	Cocktail Bar	Japanese Restaurant	Gym
First Canadian Place / Underground city	43.648429	-79.382280	0	Coffee Shop	Café	Restaurant	Gym	Hotel	Seafood Restaurant	Steakhouse	Japanese Restaurant	American Restaurant
Christie	43.669542	-79.422564	2	Grocery Store	Café	Coffee Shop	Park	Restaurant	Baby Store	Italian Restaurant	Athletics & Sports	Diner
Queen's Park / Ontario Provincial Government	43.662301	-79.389494	4	Coffee Shop	Yoga Studio	Creperie	Mexican Restaurant	Juice Bar	Italian Restaurant	Hobby Shop	Fried Chicken Joint	Distribution Center

As seen Rosedale, Christie and Regent park have a parks in their common venues, have lesser resturants and bars. This makes these three locations potential restaurant spot

Further taking into consdideration the accesibility to 'subways' and 'residensial area', we'll create a score card

- The arrows point towards the restaurants in the area
- The blue circles represent subways
- The Black stars represent residensial area

As noted before that the three locations: Rosedale, Christie and Regent park have a parks in their common venues, have lesser resturants and bars. Now we are going to work towards picking the one with more accessibility to subway and has more residensial area located near it

### Results section where you discuss the results.

Using the resultant data we can obtain the below score card. Using this scorecard we'll discuss options and arrive at a conclusion

	Neighborhoods	Restaurants	Parks	Subway	Residensial
0	Rosedale	0	5	4	1
1	Christie	0	3	5	5
2	Regent Park	5	3	2	1

### Discussion section where you discuss any observations you noted and any recommendations you can make based on the results.

1. Rosedale Neighborhood is noticed to have parks which can attract a large crowd making the restaurant visible, has no competition in terms of restaurants and has accesibility to subways, but residensial score is low
2. Christie Neighborhood is notices to have a park, high score for sub way accesibility and residensial area, making it a hub for potential customers without much of competition
3. Regent Park, having a high score for restaurants makes it unlikely of choice

### Conclusion section where you conclude the report.

Therefore, i would recommend that Christie neighborhood to be the ideal location
